PROFESSIONAL SUMMARY

Senior Frontend Engineer with 4+ years of experience building production-grade web applications using React, Next.js, and TypeScript. Strong in frontend architecture, scalable component systems, state management, performance optimization, and multilingual applications. Experienced in owning end-to-end frontend delivery across government, enterprise, and commercial products, while leading code reviews, mentoring developers, and driving engineering standards.

EMPLOYMENT

Senior Front-End Developer DIGITAL HUB - Egypt Jun 2023 – Current

- Own frontend architecture and technical direction across multiple production applications, defining scalable structures, component patterns, state-management strategies, and engineering conventions.
- Deliver **end-to-end frontend features** across UI, **state management**, **API integration**, **error handling**, **responsive behavior**, and **production delivery**.
- Drive **performance optimization**, **legacy refactoring**, **accessibility**, and **code-quality improvements** across production applications.
- Lead code reviews, technical decomposition, estimation, prioritization, and engineering standards across the frontend team.
- Mentor interns and junior developers through structured reviews, learning paths, technical guidance, and progressive ownership.
- Collaborate with Product, UX/UI, QA, and backend teams to translate business requirements into production-ready technical solutions.

Front-End Developer Zari Solutions – Remote (S.A) Jul 2022 – May 2023

- Developed responsive and reusable frontend features using **React**, translating Figma designs into pixel-accurate interfaces across desktop and mobile.
- Integrated frontend functionality with backend APIs, handling **UI states**, **validation**, and **user interactions**.
- Investigated and resolved frontend UI and logic issues while maintaining clean, reusable component structures.

EDUCATION

Cairo, Egypt Al-Azhar University Oct 2015 – Jul 2019

- B.S.E. in Engineering, Accumulative Grade: Excellent with Honor, **1st in class (GPA: 3.6)**.
- Graduate Project Title: Food Industries.
- Graduate Project Grade: Excellent.

TECHNICAL EXPERIENCE (Projects) — Frontend Engineer

- **CAPMAS**  — **National Data & Statistics Platform** (2023 - 2025)
Delivered **90%+ of the frontend** across the public platform and administrative dashboard, owning architecture, implementation, API integration, optimization, and production delivery.
Built complex dashboards, forms, charts, maps, data visualizations, and content-driven workflows for a large-scale government platform.
Implemented a **streaming chatbot experience using Server-Sent Events (SSE)**, handling incremental response streaming, connection lifecycle, cancellation, error states, and progressive UI updates.
Implemented Arabic/English experiences with comprehensive **RTL/LTR support** across layouts, components, forms, and data visualizations.
Integrated REST APIs and managed application/server data using **Redux Toolkit**, **Redux Saga**, **SWR**, and **Axios**.

Tech:

React, Redux Toolkit, Redux Saga, SWR, Axios, MUI, React Hook Form, React Intl, React Chart.js, React Leaflet, React Markdown, Sass, Bootstrap.

- **AIO — Enterprise Project Management Platform (2024)**

Delivered **95%+ of the frontend**, owning architecture and implementation across complex enterprise workflows.

Built data-intensive dashboards for **project management, financial tracking, supplier/contractor management, payments, and operational analytics**.

Implemented **RBAC**, complex forms, tables, filters, visualizations, and permission-aware workflows.

Integrated REST APIs and implemented Arabic/English experiences with consistent **RTL/LTR support** using Redux Toolkit, Redux Saga, SWR, and Axios.

Tech:

React, Redux Toolkit, Redux Saga, SWR, Axios, Ant Design, React Router, React Intl, Tailwind CSS, Sass.

- **Al-Weam Cars — Automotive E-commerce Platform (2025)**

Owned and delivered the frontend of a multilingual automotive e-commerce platform serving the UAE market, covering both the customer-facing platform and administrative dashboard.

Built advanced vehicle discovery and listing experiences, including **search, filtering, detailed vehicle views, and interactive browsing workflows**.

Implemented complex business workflows including **vehicle trade-in forms, financing/loan calculator, real-time offers, and customer interaction flows**.

Developed the administrative dashboard for managing platform operations and business workflows, with **Arabic/English localization and comprehensive RTL/LTR support**.

Integrated REST APIs and managed application data using **Redux Toolkit, Redux Saga, SWR, and Axios**, with a focus on responsive UX and maintainability.

Tech:

React, Redux Toolkit, Redux Saga, SWR, Axios, Ant Design, React Router, React Intl, EmailJS, Swiper, Sass.

- **Daleel Mob 🇦🇪 — High-Traffic Electronics Marketplace (2024)**

Independently developed the frontend of a high-traffic marketplace used by **thousands of users** to discover mobile phones, electronics, and available deals.

Built responsive marketplace experiences across **desktop, tablet, and mobile**, with reusable UI patterns and scalable page structures.

Implemented dynamic product and marketplace experiences with REST API integration, handling **loading, empty, error, and interaction states** across user journeys.

Focused on **frontend performance and reliable UX** for a production application operating under significant traffic.

Tech:

JavaScript, jQuery, Axios, SCSS, Bootstrap 5, HTML5.

- **3aedi 🇦🇪 — Revenue & Business Management Platform (2025)**

Independently developed the frontend of a business management platform covering revenue tracking, sales performance, advertising campaigns, expenses, and team management.

Built data-intensive **analytics dashboards, charts, tables, filters, and interactive workflows** for monitoring business and operational metrics.

Implemented the application using **TypeScript**, with reusable components and maintainable patterns across complex business workflows.

Integrated REST APIs and managed application/server data using **Redux Toolkit, Redux Saga, SWR, and Axios**.

Tech:

React, TypeScript, Redux Toolkit, Redux Saga, SWR, Axios, Ant Design, React Router, React Chart.js, Tailwind CSS, Sass.

Skills and Technologies

- **Frontend Engineering:** JavaScript, TypeScript, React, Next.js, HTML5, CSS3.
- **Frontend Architecture:** Component Architecture, Modular Architecture, State Management, API Integration, Design Systems.
- **State & Data:** Redux Toolkit, Redux Saga, React Query, SWR, Axios, Fetch.
- **Styling & UI:** Sass/SCSS, Tailwind CSS, MUI, Ant Design, Bootstrap.
- **Web & APIs:** REST APIs, HTTP, Server-Sent Events (SSE), Fetch API, Browser APIs, Authentication, JSON.
- **Engineering:** Git, GitHub, Azure DevOps, Postman, Swagger, Agile/Scrum.
- **Performance & Quality:** Performance Optimization, Accessibility, Testing, Security, Debugging, Code Review.

Languages

- **Arabic:** Native.
- **English:** Professional working proficiency.
